Ultimate Tension Series Snaredrums

For high tension instruments in general is one aspect extremely important: **Strength!!** Over the years different manufacturers searched for strength in adding materials to make the drums as strong as possible. Thicker shells, support rings, lots of massed materials with a certain result: Strong and durable drums but often way to heavy. Our engineers took the challenge to think and design in the opposite way. Instead of adding materials they designed a concept to avoid the use of materials. Taking advantage of modern design technology. Through smart manufacturing and extraordinary designing scales the result is amazing: "An extreme high tension snare drum with less weight, together with a modern and exclusive appearance"

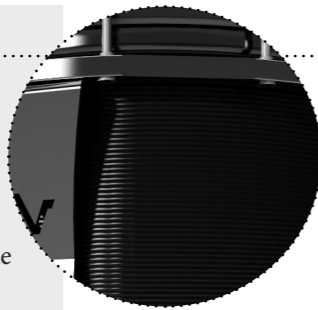

Tension Rods

The drums are fitted with 12 stainless steel tension rods (M6 X 1,5) for durability and strength to stand the high tension suitable for these drums, creating the sound / tension you need.

Collar

Made out of special aluminium alloy. Focused on strength and durability. Precisely CC machined to create just the best construction for both bearing edge and extreme high tension. The collar just stand for quality and a life time durability. To adapt the drum to a carrier we choose the collar to attached the adaptor for a strong connection between carrier and drum.

Lugs

12 aluminum tubelugs are used to complete the freefloating concept. The tube lugs do have strong and precisely manufactured chrome plated inserts to create the extreme and accurate tension you need for this most outstanding drum.

Protection Brackets

To protect the different snarestrainers and tensionhoops when putting the drum on the floor, a set of 2 solid chrome plated brackets are mounted on the drum.

Drumheads

We only use the best component and therefore these series we chose for Remo Falam Series as a standard, but optional you can choose for White/Black Max or Cybermax drumhead.

Top | Remo Falam Series

Bottom | Depending on snarestrainer
TO: Remo Ambassador TD
UCS: Remo Ambassador SA

"The best drums need only the best available drumheads"

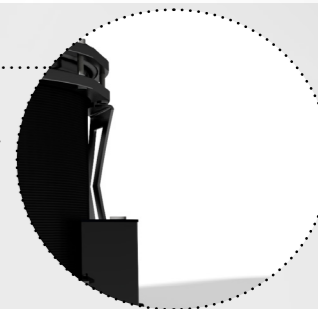

Tensionrings

Made out of special aluminium alloy. Focused on strength and durability. Precisely CC machined, mirror finished and available in different finishes. Just the best quality available on the entire market.

Top Strainer

For using the drum with or without snares we created the most sophisticated top strainer. Easy to handle and fully adjustable, both height and snare tensioning. CC machined components like Delrin and special high quality anodized aluminium the strainer are the absolute top level available.

Bottom Strainer | Two different models to choose from

FCS STRAINER | This Throw off strainer is very sturdy and specific. The strainer is mounted on the tubes lugs of our UTS series, to avoid contact with the shell. Both height and tension and snare height are fully adjustable over a large range. On top of that, the snare can be precisely tuned individually.

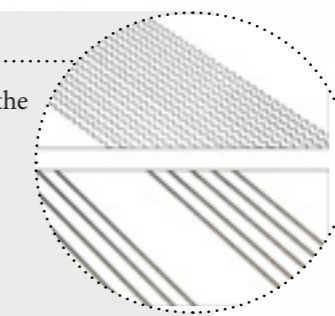

UCS STRAINER | The biggest innovation in snaredrum technology! Made out of special designed extrusion profiles precisely CC machined. This ultimate strainer gives the snare drummer the comfort of shifting the strainer during his playing activities. Besides a technical high standard it gives an ultimate in musical performance! Tension and height of the snares are fully adjustable. The one and only on the entire market

Snares

Top | Using wire snares (20 strands) the available snare systems stand for the most crispy and accurate sound available.

Bottom | Depending on model of strainer:
LTO - 8 individual adjustable cable snares
UCS - 16 individual adjustable cable snares

Ultimate X-TREME Series snaredrums | Always a step ahead!!

Shells

Plywood Impact | A 4mm 6-ply wooden shell made out of a combination of beech and occume. Both wood species which are the basics of light and strong drums shell.

Plywood Impact / The heartbeat of your drum!

Color Options

“Various Shell and Hardware colour finishes available, please ask for colour charts!”

Aluforce | Precisely CC bended and welded aluminium shells made out of a special 1.5 mm aluminium sheet material. Extremely light in weight with an excellent performance in sound and durability.

Aluforce / It just says where it stands for!

Color Options

“Various Shell and Hardware colour finishes available, please ask for colour charts!”

Features and Models

Art. nr.	Size	Shell	Tensionrings and Collar	Lugs	Strainer	Top-wires	Bottom-wires	Tension Rods	Remo Falam	Weight
